Artus Leong

PROGRAMMER | CAD DESIGNER | SYSTEMS & SUPPORT

+65 93826358 | ArtusLeong@gmail.com |

PERSONAL PROFILE

Hands-on technology graduate with practical experience in CAD modeling, software development, and hardware/printer troubleshooting. Comfortable diagnosing technical issues across both software and physical equipment, maintaining 3D printing workflows, and supporting general IT systems. Eager to apply a multi-disciplinary, problem-solving mindset to a production engineering environment.

KEY SKILLS

Programming Languages: Python | C++ | C# | SQL
CAD: FreeCAD | SolidWorks | Onshape
Technical: 3D Printing | 3D Printer Maintenance & Troubleshooting | CAD Modelling | PC & Server Troubleshooting | General IT
Development: Game Development | Debugging | Software Testing | Quality Assurance
Professional: Team Leadership | Client Communication | Project Coordination | Problem Solving | Attention to detail

EDUCATION

Nanyang Polytechnic
Diploma in Game Development and Technology

WORK EXPERIENCE

Game Developer Intern
Cargo Studios **November 2023 - February 2024**

- Assisted in the development of the studio's upcoming flagship game.
- Performed gameplay and map debugging, testing, and quality assurance.
- Contributed to the testing and debugging process supporting seasonal game updates.
- Collaborated with developers to identify and resolve gameplay issues before release.

SELECTED PROJECTS

Open-Source CAD Design & Community Release | FreeCad, 3D Printing
Designed and publicly released functional hardware components.
Achieved active community adoption, with external users downloading, modifying, and remixing base CAD for own setups.

Real-Time Networked Multiplayer game | C#, Unity, Photon PUN
Created a real-time networked multiplayer system from foundational architecture to a functional core loop supporting self-hosted lobbies.

Mobile Dental Education App (Final Year Project Lead) | Client-Facing & Project Coordination
Co-led a student team to design and deliver a mobile application educating new dental students on basic teeth scaling and cleaning techniques for in-house dental clients.
Acted as primary liaison with dental professionals, gathering clinical requirements, managing project milestones, and translating workflows into software specifications.
